Identify why the preferred agents cannot be used:

Drug information

All drugs in this class are eligible to receive a six-month approval. Complete the following questions.
For preventive treatment of migraine, does the member meet the *step edit and the following criteria?

- Does the member have a diagnosis of migraine with or without aura based on International Classification of Headache Disorders (ICHD-III) diagnostic criteria? AND
☐ Yes ☐ No
- Is the member ≥ 18 years of age? AND
☐ Yes ☐ No
- Has the member been utilizing prophylactic intervention modalities (for example, pharmacotherapy, behavioral therapy, physical therapy, etc.)? AND
☐ Yes ☐ No
- Does the member have a diagnosis of chronic migraines defined as 15 or more headache (tension-type-like and/or migraine-like) days per month for > three months? AND
 - Member has had at least five attacks with features consistent with migraine (with and/or without aura); AND
 - On at least eight days per month for > three months:
 - Headaches have characteristics and symptoms consistent with migraine; OR
 - Member suspected migraines are relieved by a triptan or ergot derivative medication; AND
 - Member has failed at least an eight-week trial of any two oral medications for the prevention of migraines (for example, antidepressants, beta blockers, antiepileptics) prior to initiation of eptinezumab; AND
 - Member had an inadequate response (or unable to tolerate) a minimum trial of at least two preferred self-injectable CGRP options; OR☐ Yes ☐ No
